PMITZ
Subscriptions, Plans & Limits

Pmitz: Plans and Limits

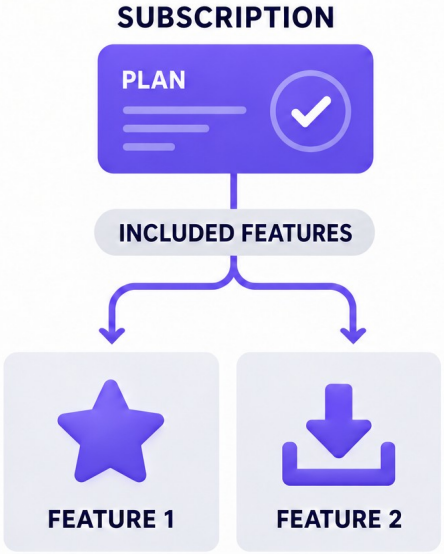

Plans

Which existing features a customer can use.

Limits

How much they can use, over what period, and for which customer, user or group.

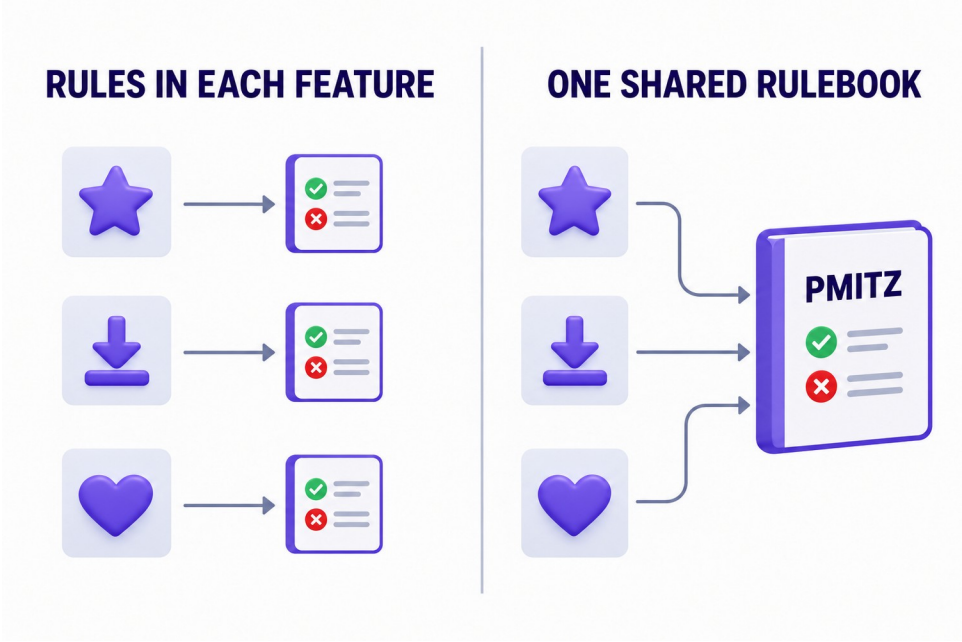

Pmitz applies both when the customer uses your product.

PMITZ
Subscriptions, Plans & Limits

You promised 200 downloads.

Plan promises		Old rule
200 downloads	≠	100 downloads

Your customer still gets stopped at 100.

A plan change can leave old rules behind.

One service, two subscription plans

Free

10 downloads / month

Music with ads for one listener

Premium

100 downloads / month

Ad-free. Family shares the 100 downloads.

Premium this month: 70 used / 30 remaining

PMITZ
Subscriptions, Plans & Limits

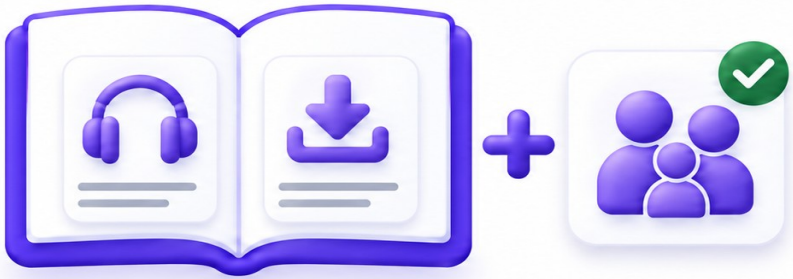

Change what a plan includes

Feature change

Add family sharing to Free

Before: one listener

After: sharing

Limit change

Increase Premium's limit from 100 to 200 downloads/month

For features already implemented in your product.

Update included features and usage limits without rewriting the existing feature logic.

PMITZ
Subscriptions, Plans & Limits

One download: check, use, record

Premium after the change: 200 downloads/month, shared by the family.

Pmitz checks

Included in Premium

70 / 200

130 remaining

1 download fits

Music app

Completes 1 download.
Reports it to Pmitz.

Pmitz records

This month's total

71 used

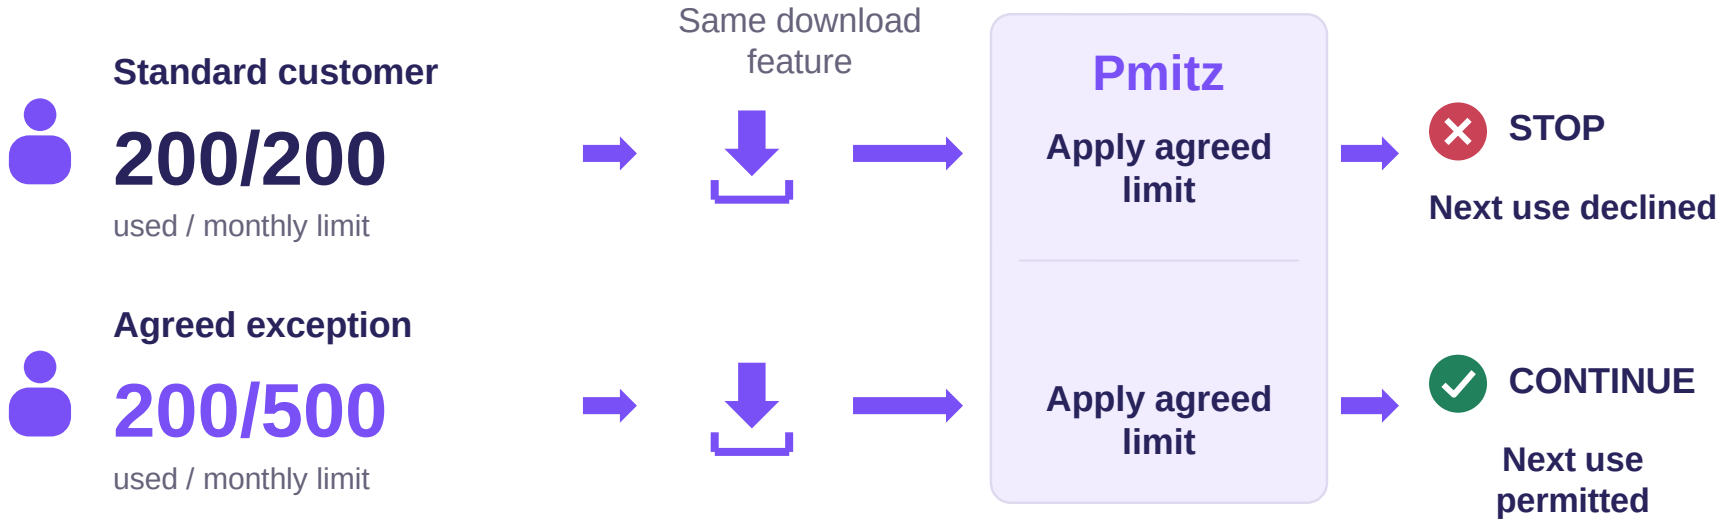

129 remaining

The next download uses the updated total.

PMITZ
Subscriptions, Plans & Limits

Give one customer a different deal.

Premium: 200 downloads/month. One customer has an agreed limit of 500.

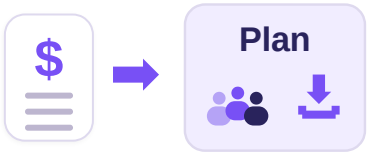

Pmitz applies each customer’s agreed terms.

PMITZ

Pmitz updates occupied slots.

Potential directions to evaluate

Exploration areas, separate from current functionality. No delivery commitments.

More integrations

Connect additional subscription and usage sources.

Usage analytics

Understand consumption and feature use.

AI-assisted analysis

Explore unusual use and possible recommendations.

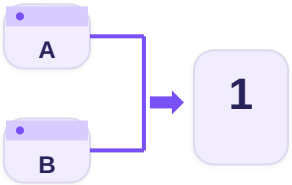

Advanced policy tools

Explore combined rules, simulation and validation.

Current embedded and remote connection options are shown in A2.

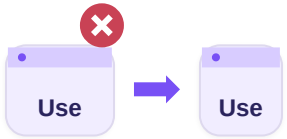

Test situations for technical evaluation

Requirements for the complete application flow. These are not established guarantees.

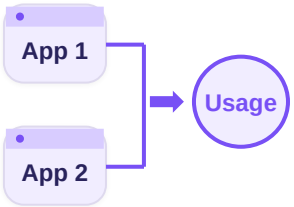

Two requests, one use left

Check safe simultaneous consumption.

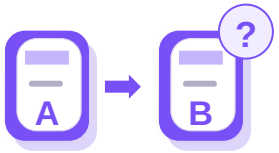

A failed or repeated action

Check retry, cancellation and duplicate behavior.

Several product instances

Check shared usage state and consistency.

A plan change or outage

Check rule updates, recovery and failure behavior.

PMITZ
Subscriptions, Plans & Limits

Hypothetical support-subscription market

Fixed price assumption; company counts and growth vary.

HYPOTHETICAL SUPPORT SUBSCRIPTION. NOT SAAS PRICING.

US$200/month × 12 = US$2,400 per company per year

Lower scenario

5,000 companies

Hypothetically eligible in 2027

5% growth / year

Spend at 100% uptake

2027: US$12M

2031: US$15M

Middle scenario

10,000 companies

Hypothetically eligible in 2027

10% growth / year

Spend at 100% uptake

2027: US$24M

2031: US$35M

Higher scenario

20,000 companies

Hypothetically eligible in 2027

15% growth / year

Spend at 100% uptake

2027: US$48M

2031: US$84M

Eligible companies × 100% uptake × US$2,400/year = annual spend

Hypothetical support scenario. Not SaaS pricing, validated demand or Pmitz revenue.
